

City of Wenatchee Pedestrian Master Plan

Vision: The Pedestrian Master Plan will create a safe and intentionally connected walking network to provide an equitable, aesthetic and sustainable system that leads to neighborhood revitalization opportunities as a result of enhanced social interaction, quality of life, and motivation to utilize the reliable and interest invoking asset. It will guide cost appropriate projects and programs that positively impact economic vitality, universal access and mobility, the well-being of users and the environment while revealing possibilities for improved way-finding and community supported pocket parks.

Goals: The Pedestrian Master Plan establishes a cohesive approach to achieving the goals of the community through identified strategies, projects, programs and partners. Each goal identifies what the City of Wenatchee community and stakeholders want to see as the “Pedestrian Future”.

SAFETY

- Zero pedestrian injuries
- Eliminate hazards to pedestrians
- No restrictions
- Crosswalk timing for universal use
- Citizen education around walking elements

CONNECTIVITY

- Walking is an intentional use of transportation
- Effective connections among and between multimodal options

EQUITY

- Complete infrastructure in high use areas
- Broaden representation on boards and commissions

COMMUNITY

- Promote Walking
- Improve relationship between pedestrian and bicycle riders
- Establish walking programs and events
